Why Global Health at McMaster?

- **Trans-cultural learning** with partner universities in Colombia, the Netherlands, Norway, India, Sudan, and Thailand
- **Opportunities for exchange** to Maastricht University (the Netherlands) or the University of South-Eastern Norway
- **Global Health symposium** at one of our partner universities with students from across Europe, Africa, and Asia
- **Field practicum** for course-based students, which can be completed locally, nationally, or internationally
- **Blended learning** through online technologies used regularly by global health professionals
- **A growing network** of McMaster MSc Global Health alumni can open a world of opportunity
- **International advisory board** and transdisciplinary faculty comprised of experts in global health

How to Apply

Applications are accepted online from early November to the end of January

For more information about applications visit: [globalhealth.mcmaster.ca/program-overview/how-apply](globalhealth.mcmaster.ca/program-overview/how-apply)
Program Curriculum

Bringing together the fields of economics, policy, business, and health, and linking with partner universities in the Netherlands, India, Norway, Colombia, Sudan, and Thailand, this award-winning program offers a truly international experience. This full time, 12 month program is held over three terms.

Thesis students take six core graduate half courses and one elective related to their research.

Course-based students take eight core graduate half courses and three elective courses from their selected concentration.

Concentrations in Winter Term

During the winter term, students can specialize in a particular area of global health by choosing a concentration (track). Students at McMaster can choose from any of the three concentrations.

McMaster University

1. Globalization and Equity
2. Global Health Management
3. Global Burden of Disease: Challenges and Changes

Maastricht University, the Netherlands

1. Implementing Innovations on a Global Scale
2. Global Health Leadership and Organization

University of South-Eastern Norway

Exchange Opportunities

Course-based students can apply for exchange in the winter term, selecting one of the two concentrations (tracks) at Maastricht or the concentration available at the University of South-Eastern Norway.
